

Education

Einstein College of Engineering
B.E., Computer Science and Engineering

Tirunelveli, India
2020 - 2024

Tilak Vidyalaya HSS
Higher Secondary School Examination

Tirunelveli
2018 - 2020

Programming Skills

AI / LLM Systems: RAG Systems, Agentic AI, Knowledge Graphs

LLM Frameworks: LangChain, LangGraph, Google ADK

Backend Development: Python, FastAPI, REST APIs

Frontend Development: React JS

Full Stack: MERN and End-to-end AI Application Development

Databases / Storage: SQL, Vector Databases

Deployment / Infra: Docker, Cloud-based Deployment

Version Control: Git

Work Experience

IntWhizz Business Solutions
Full Stack Developer

Tirunelveli, India
Aug 2025 – Present

- *Developing scalable business web applications using full-stack architecture with modern frontend and backend frameworks.*
- *Designed and implemented RESTful APIs with secure authentication and authorization mechanisms.*
- *Collaborated using Git-based version control and followed structured development workflows.*
- *Built responsive and user-friendly interfaces using modern UI frameworks.*

Sentinix Tech Solutions
Full Stack Developer

Tirunelveli, India
Mar 2025 – Jul 2025

- *Developed full-stack web applications with integrated databases and scalable backend architectures.*
- *Implemented RESTful APIs for seamless communication between frontend and backend systems.*
- *Worked closely with databases to ensure data integrity and efficient data access.*

Languages

- Tamizh (Native)
- English (Professional)

Projects

DocToRAG

- Built a multi-document RAG system with embedding-based retrieval and contextual switching across documents.
- Used MongoDB for vector storage and similarity search to improve retrieval relevance.
- Improved response accuracy using prompt engineering with context-aware retrieval.
- Developed scalable LLM workflows using Google ADK.

DrugGraph

- Built a knowledge graph system for biomedical drug relationship modeling using Neo4j.
- Converted natural language queries into Cypher and returned results in plain English.
- Enabled interactive graph visualization for exploration.
- Improved query understanding and graph traversal accuracy.

MeetBot

- Built an agentic system that extracts intents from Google Meet live captions via Chrome extension.
- Detected actions like scheduling and email sending from conversations.
- Triggered automated workflows based on extracted intents.
- Used Google ADK for intent detection and agent orchestration.

Voice AI-Driven E-Commerce UI

- Built a React-based e-commerce UI with voice-driven product interaction.
- Integrated ElevenLabs for real-time voice feedback and synthesis.
- Connected voice agent via MCP server for orchestration.
- Used voice AI to enhance product discovery and purchase decisions.

InChat

- Built a LangChain-based conversational RAG system with hybrid vector and knowledge graph retrieval.
- Implemented dynamic retrieval routing based on user intent.
- Added intra-chat and inter-chat memory for context retention across sessions.
- Designed modular LLM workflows for retrieval and response generation.

RPA-ECommerce

- Built a natural language to browser automation system for e-commerce workflows.
- Converted user commands into structured web actions like search, cart, and checkout.
- Implemented LLM-based intent parsing for task decomposition.
- Built a robust executor handling dynamic DOM changes and UI failures.
- Enabled end-to-end automation combining LLM reasoning with browser execution.

Achievements / Certifications

- Infosys Springboard – *Node.js, MongoDB*
